MIXSOME REPORT

Summary

Mixsome is a DeFi Flow Tool that helps create and optimise DeFi strategies by allowing users to view complex DeFi tokens and protocols in simple flows.

The native token of Mixsome will serve the following uses:

- **Governance**-allow users to make core decisions about the protocol, roadmap, various parameters, and the whole codebase.
- **Liquidity mining**- use your tokens to maintain the liquidity pool and ensure that Mixsome tokens could be traded on all the major exchanges that list them.
- **Promotion and Referral Programs**- To further increase our popularity and recognition in the crypto world, we will pay all the clients, influencers, other platforms, blogs, and social media accounts their bonuses for referrals in Mixsome tokens.
- **Exclusive Features to Mixsome Holders**- There will be features that you will only access if you hold Mixsome tokens.

What is Mixsome?

Mixsome is an easy to use Defi Flow Tool accessible for the masses that is optimised for the highest returns.Their aims are to increase the user base and become market leaders. Mixsome will create a unique UX, simple Visa/Mastercard fiat-to-crypto on-ramp, and AI-assisted yield generation tool in one DeFi app.

Key Mixsome benefits:

- **Radically Better UX And UI.** The key point of low DeFi adoption is hard to grasp DeFi UX, which is tailored to developers and heavy crypto enthusiasts but completely ignores the average customer. Mixsome will utilize state-of-the-art UX and UI techniques to develop customer flow to be accessible for mainstream investors.
- **Easy fiat-to-crypto access.** Mixsome will work with fiat-to-crypto providers like Ramp, MoonPay, and Simplex to integrate Visa and Mastercard payment railways. This way, it will allow easy onboarding of retail investors from existing USD and EUR bank accounts to crypto and DeFi tokens.
  AI-Boosted Yield Generation Tools. Mixsome will use machine learning and AI-assisted algorithms to create proprietary trading mechanisms that search, optimize, and propose high or most profitable DeFi yield returns. All in all, Mixsome will create a unique and functional user UX, simple Visa/Mastercard fiat-to-crypto exchange, and AI-assisted yield generation tool.
  Pre-built optimized investment packages - money maximizing flows! Mixsome uses data science to predict and optimize flows that clients use to gain the highest profits at the lowest risk.
  Highest Security Measures. Mixsome uses their own contracts to execute user transactions across different DeFi protocols. Once the transaction is executed successfully, the Mixsome contract sends all the funds back to your wallet - Mixsome doesn't hold any of the client's crypto.
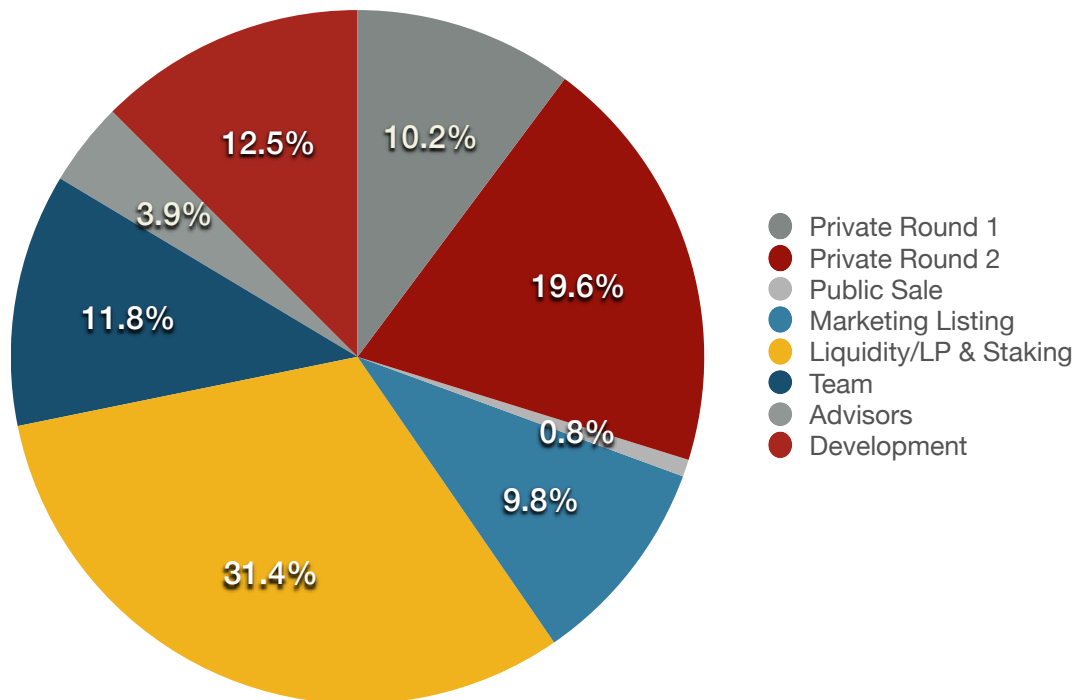

MIXSOME REPORT

Mixsome Token Sales Data

Type	Tokens	Token Price	Amount to raise	Fully Diluted Vol.	TGE market cap at Public price
Private Round 1	13,000,000	$0.0558	$725,400	$7,114,500	$225,225
Private Round 2	25,000,000	$0.07725	$1,931,250	$9,849,375	$433,125
Public Sale	1,000,000	$0.1155	$115,500	$14,726,250	$115,500
Marketing/ Listing	12,500,000				$216,563
Liquidity/LP & Staking incentives	40,000,000				$323,400
		TOTAL	**$2,772,150**	**Initial mcap:**	**$1,313,813**

Mixsome Token Allocation

Type	Allocation	Vesting
Private Round 1	10.2% of total token supply	15% unlocked on TGE, remaining unlocked linearly over one year
Private Round 2	19.6% of total token supply	15% unlocked on TGE, remaining unlocked linearly over one year
Public Sale	0.8% of total token supply	No vesting
Marketing Listing	9.8% of total token supply	15% unlocked on TGE, remaining unlocked linearly over one year
Liquidity/LP & Staking incentives	31.4% of total token supply	7% unlocked on TGE, remaining unlocked linearly over 16 months
Team	11.8% of total token supply	Locked for one year, then unlocked linearly over one year
Advisors	3.9% of total token supply	Locked for one year, then unlocked linearly over one year
Development	12.5% of total token supply	Locked for one year, then unlocked linearly over one year

There will be a total of 125,500,000 Mixsome tokens with an initial circulating supply of 11,375,000.

Pie chart legend:
- Private Round 1 — 10.2%
- Private Round 2 — 19.6%
- Public Sale — 0.8%
- Marketing Listing — 9.8%
- Liquidity/LP & Staking — 31.4%
- Team — 11.8%
- Advisors — 3.9%
- Development — 12.5%

Mixsome Community Growth Overview

Product- Mixsome has built-in growth fundamentals for people wanting to share their high returns and recommend them to a friend. Mixsome's Reward System will include a mixture of incentives, such as crypto airdrops or giveaways

Influencer marketing- Mexsome expects influencer marketing to help instils trust in the product by associating Mixsome with respected onion leaders in the community.

Community- Dedicated Treasury will have Mixsome tokens allocated to allow for more distributed incentives programs in the future.

Affiliate and referrals- Mixsome will create an easy-to-use "share" link that will work as a referral link to DeFi liquidity pools, token baskets, or other DeFi like ETF mechanisms. All referrers will warm 10% bonus in referral points during the Referral Mining programme.

Mixsome Team

Growth Hacking Will M. Growth at Web3.0, CRYPTO20
Business Development Sarunas L. N26, Barclays, ConnectPay, carVertical
Blockchain Advisor Justas C. Swissquote FX
Marketing Augustas S. Mysterium Network, WePower Network
Smart Contract Developer Arminas T.
Blockchain Developer Darius D.
Finance & Operations Reda S. CFA II Level, PlateCulture, Hong Kong App
Design (UI/UX) Konstantin K.

Development Roadmap

Q1 2021

- Fundraising
- 3 DeFi flows launch
- Testnet V1 Mixsome app launch

Q2 2021

- xDai blockchain integration
- Mainnet V1 Mixsome app launch
- Integration with DEX
- Integration with wallets

Q3 2021

- Compound, Badger DAO integration
- Flash loan launch
- V2 Mixsome app launch

Q4 2021

- More protocols integration
- Insurance coverage protection
